Education

Singapore University of Technology and Design — Singapore
BEng. Computer Science *GPA: 4.59* — 2024 - 2028

School of InfoComm Technology - Ngee Ann Polytechnic — Singapore
Diploma in Information Technology *GPA: 3.73* — 2019 - 2022

School of Science and Technology, Singapore — Singapore
O-Levels — 2015 - 2018

Work Experience

Sign Pte Ltd — Singapore
Software Engineer Intern — March 2021 - August 2021

- Worked on both frontend (Elm) and backend (Node.js with Typescript) to add features and improve UI/UX of the Sign.net web app, such as adding Loading Skeletons, Email Confirmation to delete documents, Redirect on Login, and more.
- Wrote and deployed Node.js cron job that fetches application activity and summarises them into Daily Reports for the sales team.
- Created and maintained internal documentation using Markdown, and public documentation using Gitbook.

Sign Pte Ltd — Singapore
Intern — September 2020 - October 2020

- Designed and coded email templates for app.sign.net's email notifications using MJML
- Composed blog posts for www.sign.net to educate users on Sign.net's features
- Created PowerPoint presentations for use at TechCrunch Disrupt 2020

Tezos Southeast Asia — Singapore
Intern — September 2019 - June 2020

- Stock-taking using Google Sheets to account for the company's logistics
- Researched capabilities of video cameras at different prices points to purchase the best option for the company's livestreaming needs.

Academic Projects

ROOT Student Government — root.sutd.edu.sg
Secretary of ROOTech — Mar 2026 - Present
Leading a team of 10 ROOTies to maintain and add features to the ROOT website using Next.js and Supabase.

Connect 345 *FPGA* — Jan 2026 - Apr 2026
Along with 4 other members, we designed and implemented a 2-player Arcade Game from scratch on the Alchitry Au FPGA Board, including a custom ALU for computations, custom drivers to read input and drive output, and Finite State Machine for game logic.

Personal Projects

CIS Youth Hymnal *Hugo, HTML, CSS, Javascript* — github.com/church-sg/cis-youth-hymnal-v2
A PWA for church members to refer to hymn lyrics during worship

Scripts For Fun *Golang, Python* — https://github.com/notyumin/scripts-for-fun/
A repository of scripts I wrote for fun and for learning. Highlights include a TUI Connect-4 game written in Golang and Bubble Tea, and a Countdown Numbers Game solver written in Python.

Dotfiles — https://github.com/notyumin/dotfiles/
All my different config files, such as for Neovim, Tmux, Wezterm and more. Managed by GNU Stow.
